Inspired by bigger and more eye-catching type designs from England and France, Eduard Haenel was one of the first to introduce such new types to the German printing trade in the 1830s. The “Affichen-Schriften” series revives four distinctive and brutal display styles, covering a spectrum of the peculiar shapes from that era. “Doppel-Mittel Egyptienne” is based on an Egyptian imported by Haenel and advertised in 1833. It was originally shown in 1821 by William Thorowgood, London, as “Two-Line English Egyptian No. 1”. “Schmale Egyptienne No. 12” is another reissue of a Haenel typeface. With a cap height of 11.7 cm, it is the largest font shown in his specimen from 1841. “Antiques” originated at Tarbé & Cie. in Paris and hints at the splendor found in French poster typefaces. Advertised in 1839, it represents an early sans-serif adaption of a condensed Egyptian. An unidentified wide fat face, “Breite-Fette Antiqua”, embodies the formal developments that took place in the German Confederation around the late 1840s.

Pierre Pané-Farré translated the historical shapes into digital fonts for contemporary use by greatly extending the language support and adding sub- and superscript figures, as well as various font-specific OpenType features like a second set of numerals (e.g. “Schmale Egyptienne No. 12”, “Antiques”), alternate glyphs, and case-sensitive punctuation.
